# MY FOURTH GRADE SUPER YEARBOOK

Now for the first time ever, a learning activity course has been prepared that will sequentially teach those basic skills needed to meet the curriculum requirements expected in kindergarten and the first six grade levels. The very same subject matter taught in public and private schools has been carefully prepared and bound in one printed volume, or Super Yearbook, per grade level, and arranged in the same order presented in most classrooms. Each Super Yearbook is structured to teach the basic skills by using the unified approach and provides enough learning activities for the entire school year. The printed Super Yearbook lessons can be legally duplicated by the classroom teacher or used as a curriculum guide. The books are perfect for use at home by parents in a "Partners in Education" program. Complete teacher instructions are included. Printed worksheets can be legally duplicated for classroom use on any plain paper copy machine.
